

# Take Control

NTP Software QFS™ Family of Products

**“QFS provides a unique and unified management infrastructure. One easy to use interface that manages all storage resources regardless of platforms and geography. Network administrators will find it easy to develop and enforce sound storage management policies using the QFS Family of Products.”**

~ ENT Magazine

## OVERVIEW

### Control of Your Most Expensive Resource

Disk space is your server's most expensive subsystem. Control how much your users consume, manage what they put on your servers, and get real-time data on storage performance and load. NTP Software QFS™ enables you to enforce appropriate usage policies so that you can preserve system performance and availability for everyone.

## BENEFITS

### Save Time and Money on Administration

NTP Software QFS™ polices itself: Users are notified as they near their limits, file system contamination is automatically prevented, and temporary storage areas maintain themselves.

### Increase Security

Create the proper mix of centralized and decentralized network management to reduce logistical headaches by entrusting regional and departmental administrators to manage their allotted piece of the network without compromising overall security. Control the amount of access that specified users and administrators have over various container levels, and designate policies that cannot be overridden.

## BENEFITS

- **Controls quantity and content of files with user-based policies**
- **Improves end-user experience by automatically communicating and enforcing storage policies**
- **Drives down TCO while ensuring compliance**

## FEATURES

- **Control thousands of users with one set of policies across all your storage platforms.**
- **Robust and configurable storage management infrastructure**
- **Fully integrated with LDAP, Notes, Active Directory, and Exchange**

# Take Control

NTP Software QFS™ Family of Products

## BENEFITS (CONTINUED)

### Keep Tabs on Volume Utilization

NTP Software QFS™ allows you to set quotas relative to volume size and automatically notifies you if thresholds are violated. This feature ensures that you will always be aware of potential trouble spots before they escalate into serious storage problems.

**“NTP Software QFS is the Storage Management solution we needed and more. The integrated suite of products makes it a perfect fit for our network.”**

~ AIM Healthcare Services

## ABOUT NTP SOFTWARE

NTP Software is the worldwide leader in user-focused, policy-based storage management. We create platform-independent products that enable companies to automatically control the compliance, access, quotas, and lifespan of their users' stored files. NTP Software solutions also gather the analysis and planning data necessary for both short- and long-term decision making, providing everything necessary to actively control all aspects of a user's relationship with local and shared storage.

## FEATURES

- **Quotas and File Screening**
  - Quotas by user, group, disk object, share, etc.
  - Ability to block creation, modification, or usage
  - Ability to set designated exclusion groups
- **Live Real-Time System Reporting**
  - Disk and file performance
  - By user, quota, status, and much more
- **Ease of Use**
  - No reboot required
  - Compatible with all file systems, clusters
  - Scalable across desktops and servers
  - Push install to new servers
- **End User Support Infrastructure™ Included**
  - NTP Software Storage Investigator™
  - NTP Software Storage HelpSite™
  - NTP Software QFS™ Email Templates

## SUPPORTED PLATFORMS

### NTP Software QFS for NAS™

- Dell PowerVault Edition
- EMC NetWin Edition
- HP Storage Server Edition
- IBM Storage Server Edition

### NTP Software QFS for RAID™

- Windows Host Edition
- Windows Host 64-bit AMD Edition
- Windows Host 64-bit Intel Edition

### NTP Software QFS for NAS™

NetApp® Edition  
- See QFS for NAS™, NetApp®  
Datasheet

### NTP Software QFS for SAN™

- Windows Host Edition
- Windows Host 64-bit AMD Edition
- Windows Host 64-bit Intel Edition

(NTP Software supports many platforms not listed above; to find out if your platform is supported, contact one of our sales representatives today.)
